ACADEMIC PROJECTS AND EXPERIENCES

JavaScript Projects
- Menu Project - Small ecommerce food website with local data which can choose and add categories dynamically. (https://menu-cartegories.netlify.app)
- Landing Page Project - Website for a programming course.
- Password Generator App Project - An app to produce a strong random password which user can choose password length and also to contain uppercase and lowercase letters, numbers and symbols in user's password.

React Projects
- Covid-19 Tracker Project - Collect cases, deaths and recoveries data from API. The app will show data in charts and bar graphs using chart.js for each country. (https://covid-19-update-tracker.netlify.app)
- Tours Project - Also an API project showing images, tours info and prices from a URL and display for users.
- Color-generator Project - An APP using value.js for changing RGB to hexadecimal and display different color tones for users. (https://color-generator-complete.netlify.app)
- Grocery-bud Project - Similar with to-do list projects expect this project has save, edit and delete buttons for grocery lists. This is the app using local storage. (https://grocery-bud-complete.netlify.app)

POSITION

Junior Web developer
